

31 July 2023

ASX Release

QUARTERLY ACTIVITIES REPORT

For the Quarter ended 30 June 2023

HIGHLIGHTS

- Achievement of 51% earn in on the Calarie Project in NSW.
- Phase Two drilling programme completed at Wisemans Creek with results pending.
- Excellent rock chip assay results received from rock chip sampling programme completed at Burtons Dam & Majestic tenements east of Kalgoorlie. Planning for maiden drill programme in 2023.
- Company's cash balance at 30 June 2023 of \$2.86 million plus investment of \$0.38 million.

Orange Minerals NL (ASX: **OMX**) ("**Orange Minerals**" or "the **Company**") is pleased to provide shareholders with the following Quarterly Report for the three-month period ended 30 June 2023.

Corporate

At 30 June 2023 Orange had a cash balance of \$2.85 million and an investment in ASX listed Godolphin Resources Limited (ASX: GRL) (Godolphin) valued at \$0.38 million.

During the June 2023 Quarter, Orange had corporate costs to support active exploration work over the tenements including Phase Two drilling costs at the Wiseman's Creek Project (EL8554). Other exploration costs for the quarter included costs related to field work and planned drilling for the Majestic/Kurnalpi Projects WA, and costs to maintain all tenements in NSW and WA in good standing.

Orange will actively support and maintain exploration programs that target high value tenements with the potential discovery of significant orebodies in the Lachlan Fold Belt of NSW and Eastern Goldfields of WA.

Operational Highlights

Calarie Project (Orange earning 70%)

Calarie is a mining lease (ML739) and two exploration licences (EL8555, EL8580) that form a 70% earn-in joint venture with Godolphin Resources Limited (see Figure 1). The project area is located immediately north of Forbes in Central NSW.

In December 2021, ten RC drill holes totalling 1,044 metres were completed at the Calarie Project in NSW. The drilling was planned to validate historical drill holes and look to extend mineralised horizons intersected in previous drill programs. Assay results from these drill holes were excellent (detailed in an ASX announcement on 4th April 2022).

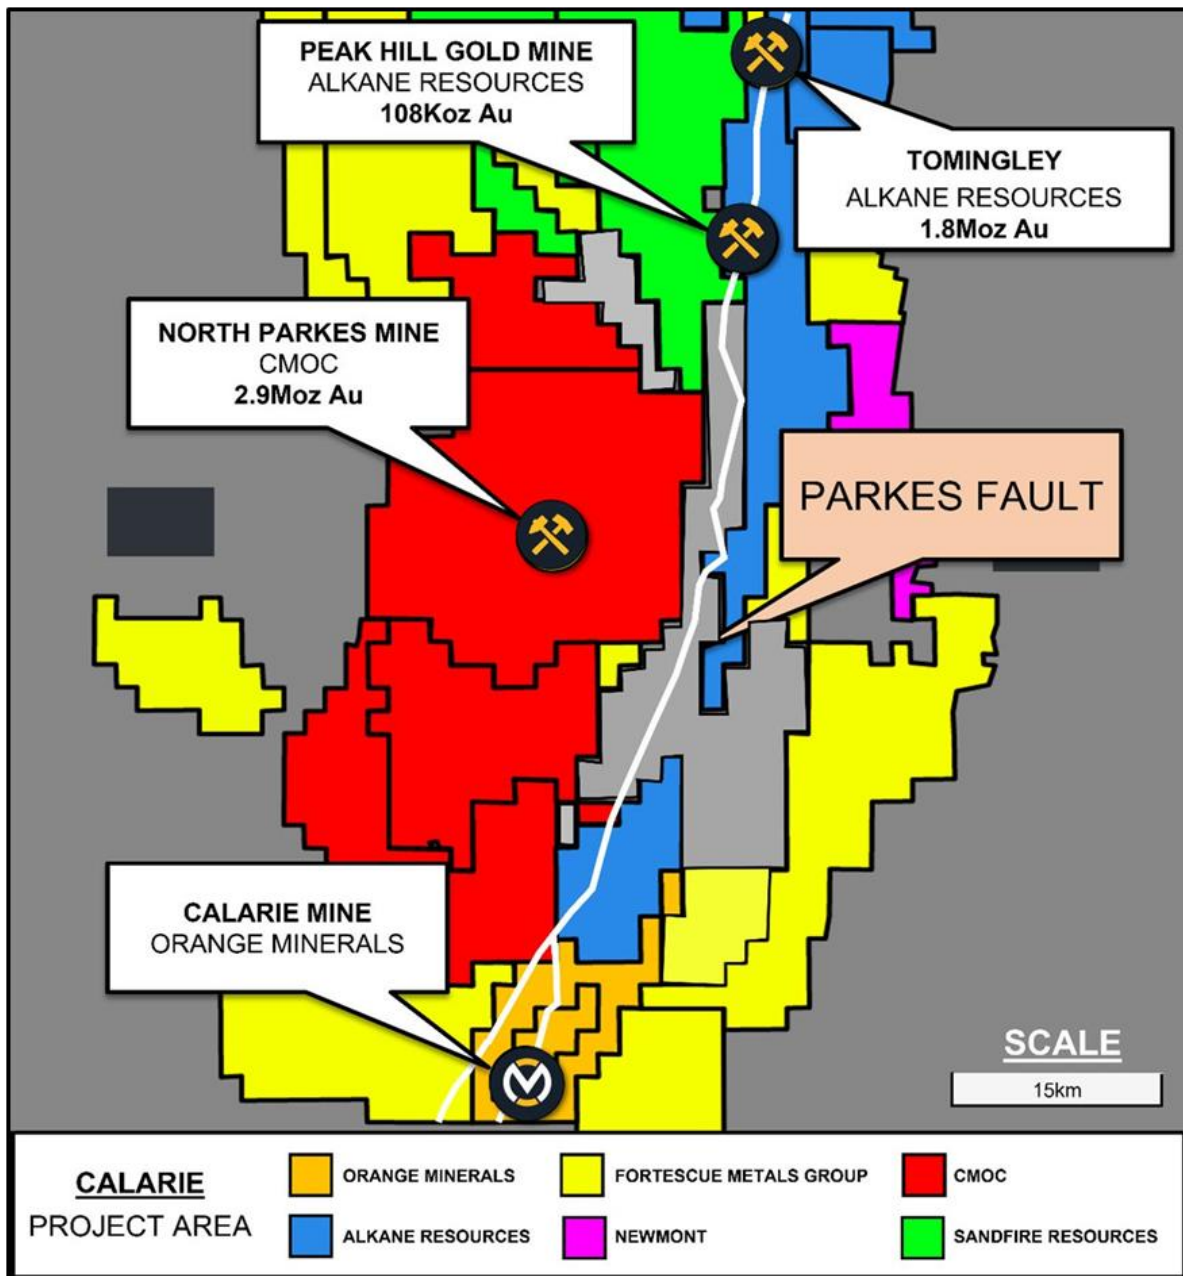

Figure 1: Map of Calarie - Project Region

During the September quarter 2022, a Phase 2 drill programme was undertaken at Calarie as a follow up to the successful Phase 1 RC drill programme. Five diamond holes drilled in the Phase 2 drill program at Calarie with a total of 1,170 metres drilled. All drill holes intersected the sheared steeply dipping mineralised contact between sediments and Daroobalgie volcanics. Hole OCDD001 intersected a 2.4m wide, historic mine void at 121.8m, with low grade gold mineralisation either side. Hole OCDD005, intersected significant gold mineralisation of 10.6m @ 5.63 g/t from 39.1m.

Three deep drillholes (OCDD002 – 4), targeting the area below the workings, intersected the same shear zone as identified in the historical shallower holes above, but without significant gold mineralisation. This indicates that the gold is associated with discrete south plunging shoots, that require further review.

In the March quarter 2023 a maiden MRE was estimated and reported in accordance with the JORC Code (2012)(see detailed announcement 13 February 2023). The Calarie MRE was estimated using ordinary kriging for Au and was reported above a cut-off grade of 0.3 g/t Au within an optimised open pit shell.

Calarie Deposit - Mineral Resource Estimate (Au 0.3 ppm cut-off)			
Classification	Tonnes (Mt)	Au (ppm)	Au (Ozs)
Inferred	0.87	1.83	50,796

Table 1: Calarie MRE by JORC classification - January 2023

Work completed at Calarie in the June Quarter 2023

On 6 June 2023 Orange announced that it has earned 51% in the Calarie Project NSW from Godolphin by incurring \$0.75 million in expenditure on the Calarie Project (EL8555, EL8580, ML739). Orange has now elected to continue its farm-in to earn an additional 19% in Calarie (to take its total interest to 70%) by spending a further \$0.75 million before February 2026. After 70% has been earned by Orange in the Calarie Project, both Godolphin and Orange would contribute expenditure to the JV, with standard dilution clauses applying. If the diluted interest of either party falls below 5%, it will convert to a 2% Net Smelter Royalty (NSR). Earning 51% at Calarie is a significant achievement for Orange. Since listing on the ASX in December 2021, Orange have completed two drill programmes at Calarie and defined an Inferred Mineral Resource Estimate (JORC 2012) of 0.87 million tonnes at 1.83 g/t gold, containing 50,796 ounces of gold.

There was no active field exploration during the June quarter 2023 other than rehabilitation of drill holes from the last drill programme.

Orange will now focus exploration on shallow mineralised targets along strike to the historical mine at Calarie (Figure 2) and in this regard is currently working to gain land access to the north of the ML. Orange will review drilling undertaken between the Calarie Resource and the Bald Hill area.

Geophysics will be considered to target favourable structures, along strike to the north of the current drill program area. The NSW Government is undertaking an Airborne Electromagnetic survey over the Forbes – Parkes belt. Orange will also undertake a review of the Wattlegrove deposit to target extensions to the interpreted mineralised zone from limited drilling.

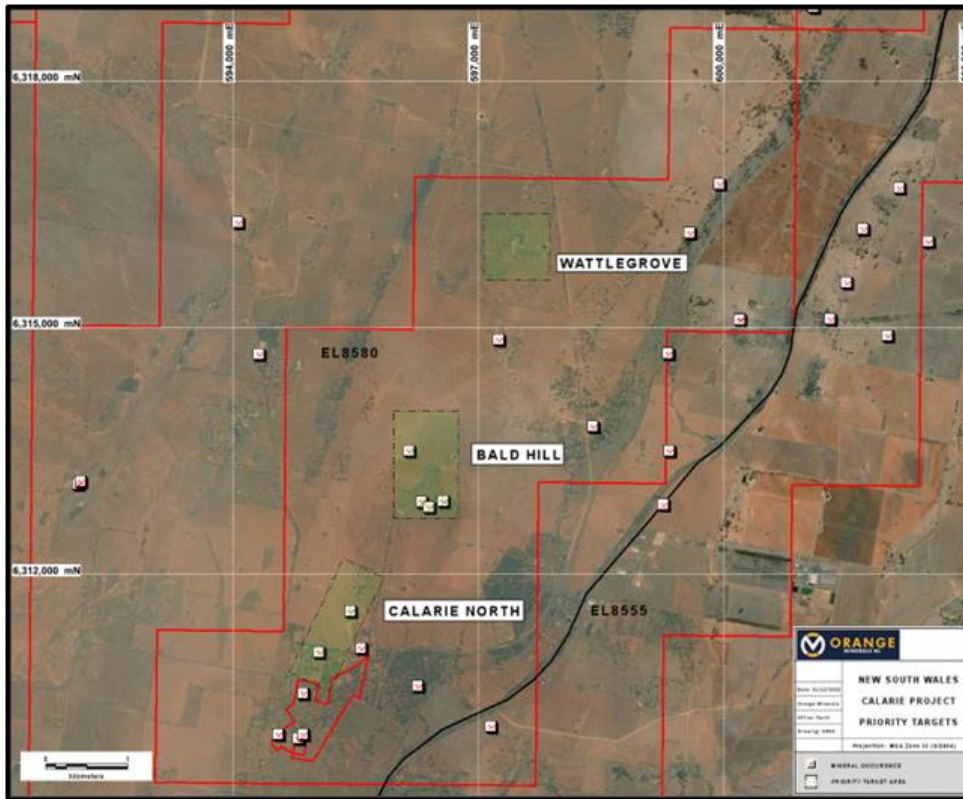

Figure 2: Calarie Project tenements and priority targets

Wisemans Creek Project

The Wisemans Creek project is located in the south-east of the Company's NSW Project area. The project is comprised of four granted exploration licences including (EL8554) see Figure 3.

Numerous historical exploration activities have taken place across EL8554, by various companies. Activities include stream sampling, rock chip sampling, outcrop mapping, geophysical surveys and drilling.

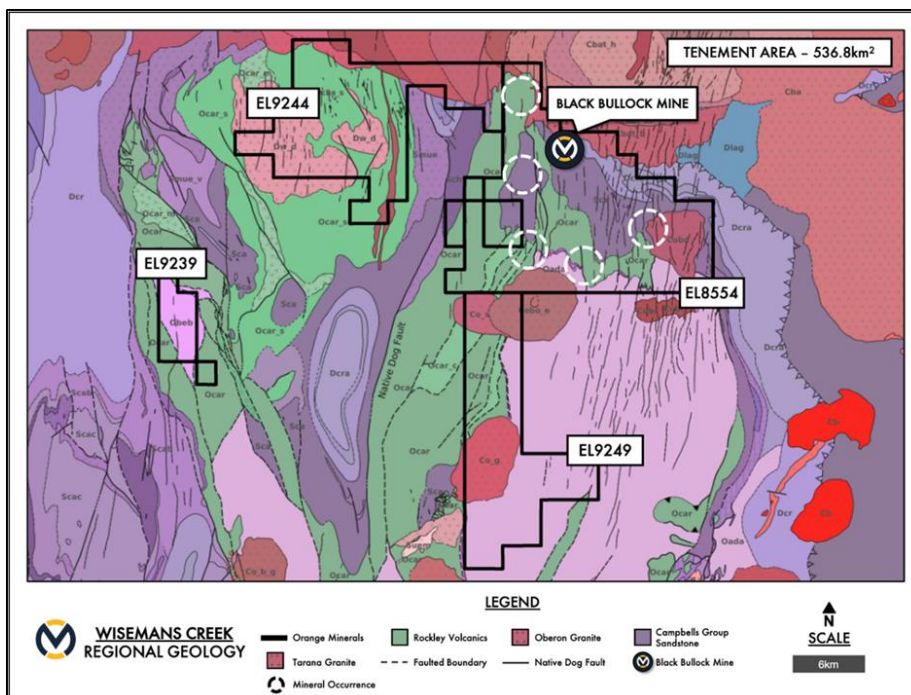

Figure 3: Map of Wisemans Creek Project

In 2022, Orange completed an initial diamond drill programme at Wisemans Creek (EL8554) drilling four diamond holes for a total of 618 metres. The best assay result was in drill hole OWCD004 which returned 24.6m @ 1.3 g/t Au from 34.4m. Low tenor silver, lead and zinc mineralisation was observed in all drill holes. The significant gold intersection in OWCD004 is associated with an extensive quartz breccia zone containing quartz veining and strong sericite/ carbonate alteration. Higher gold values coincide with stronger quartz veining and sericite alteration intensity.

Following the successful Phase 1 drill programme completed at Wisemans Creek in 2022, planning was undertaken in early 2023 for a Phase 2 diamond programme.

Work completed at Wisemans Creek in June Quarter 2023

The phase 2 diamond drill programme at Wisemans Creek was completed in early May 2023, with four holes drilled for 607.5m (see Figure 4). The drilling tested two target areas, namely:

- Target Area A - The Northwest Ridge:

Three diamond holes (OWCD006 – 8) were drilled at the Northwest Ridge prospect (see Figure 4), where drilling followed up on several excellent intersections in historical holes, including:

- **WDC004:** 19m @ 4.04 g/t Au, 15.0 g/t Ag, 0.14% Cu, 0.38% Pb, 0.09% Zn from 81m Includes 5m @ 12.78 g/t Au, 23.2 g/t Ag, 0.20% Cu, 0.27% Pb, 0.15% Zn from 95m.
- **NRP001:** 17m @ 2.13 g/t Au, 65.0 g/t Ag, 0.28% Cu, 0.70% Pb, 0.88% Zn from 102m Includes 3m @ 8.01 g/t Au, 194.0 g/t Ag, 0.76% Cu, 1.89% Pb, 2.57% Zn from 111m.
- **PWC25:** 6m @ 0.87 g/t Au, 168 g/t Ag, 0.80% Cu, 1.73% Pb and 2.02% Zn from 60.0m.

The holes intersected grey, strongly silicified siltstones and black chert of the Silurian Campbells Group. Low level sulphides were identified in the holes associated with shearing and strong siliceous alteration below surface pits and scratchings (Figure 5).

- Target Area B - Central West –

One diamond drillhole (OWCD005) was drilled west of hole OWCD004, which in the Phase 1 drilling programme returned 24.6m @ 1.30 g/t Au from 34.4m, including 7m @ 2.28g/t from 39m. The hole intersected arenites and siltstones of the Silurian Campbell Group.

Assays for the four holes are currently pending.

Hole_Id	Easting (MGA94)	Northing (MGA94)	RL	Depth	Dip	Azim (grid)
OWCD005	764389.56	6273686.18	1127.49	198.6	-63	88
OWCD006	764451.8	6274236.68	1102.4	151.5	-60	94
OWCD007	764575.42	6274210.49	1115.35	132.6	-61	275
OWCD008	764721.18	6274197.31	1123.73	124.8	-60	196

Table 2: Wisemans Creek Phase 2 Drillholes

Figure 4: Wisemans Creek Current Drill Plan

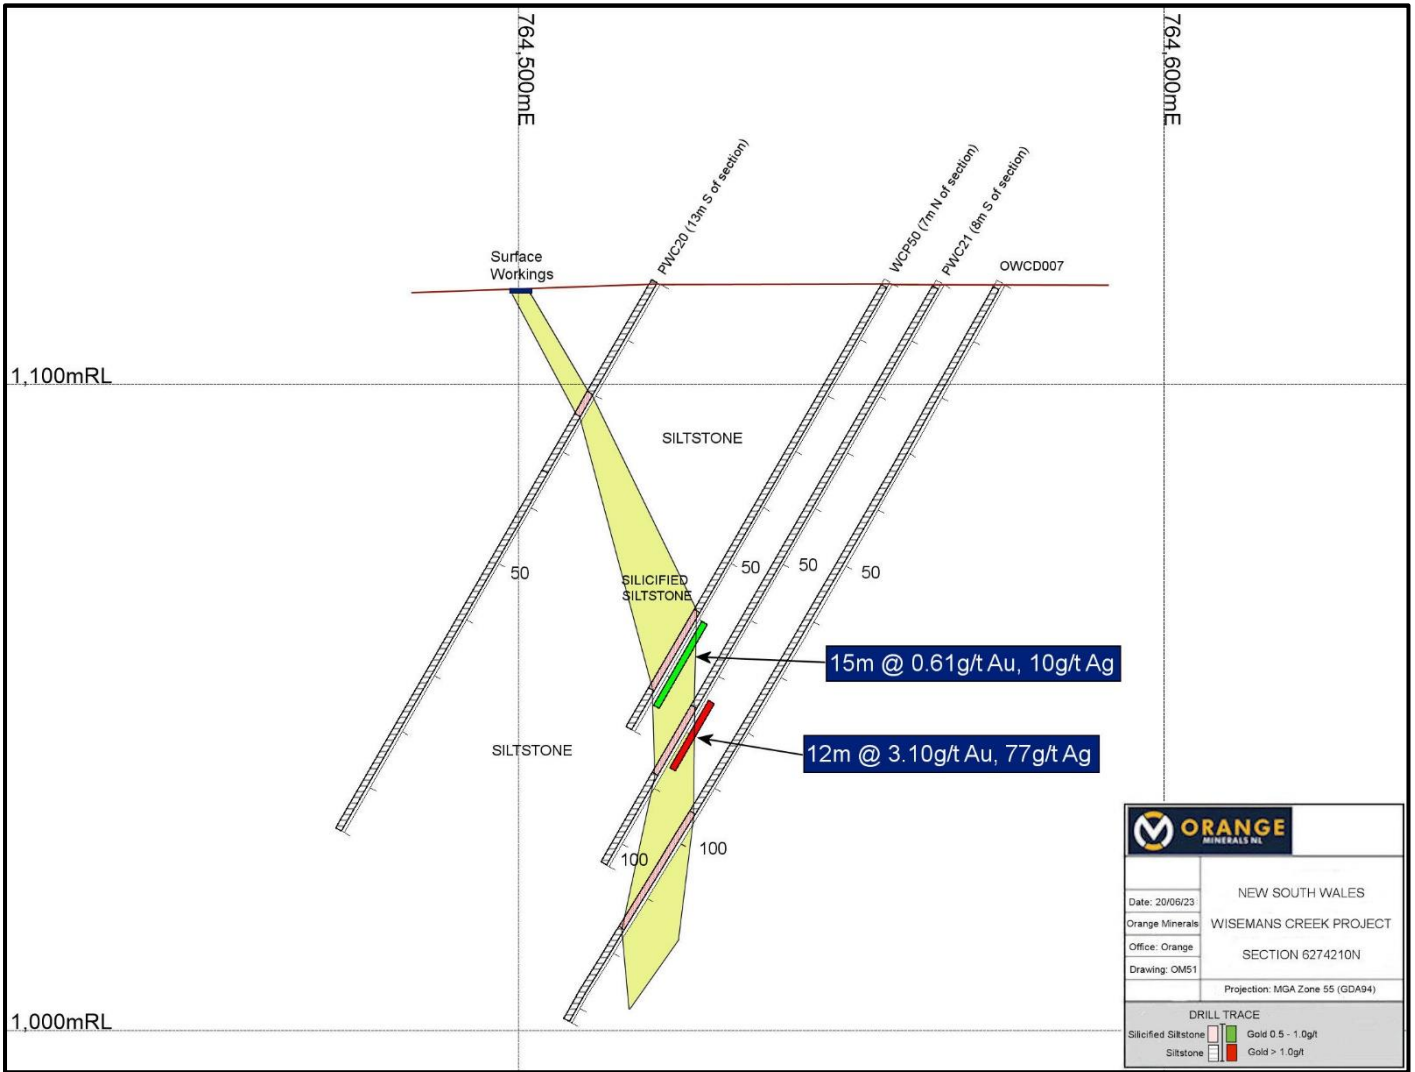

Figure 5: Wisemans Creek - Northwest Ridge Section 6274210N

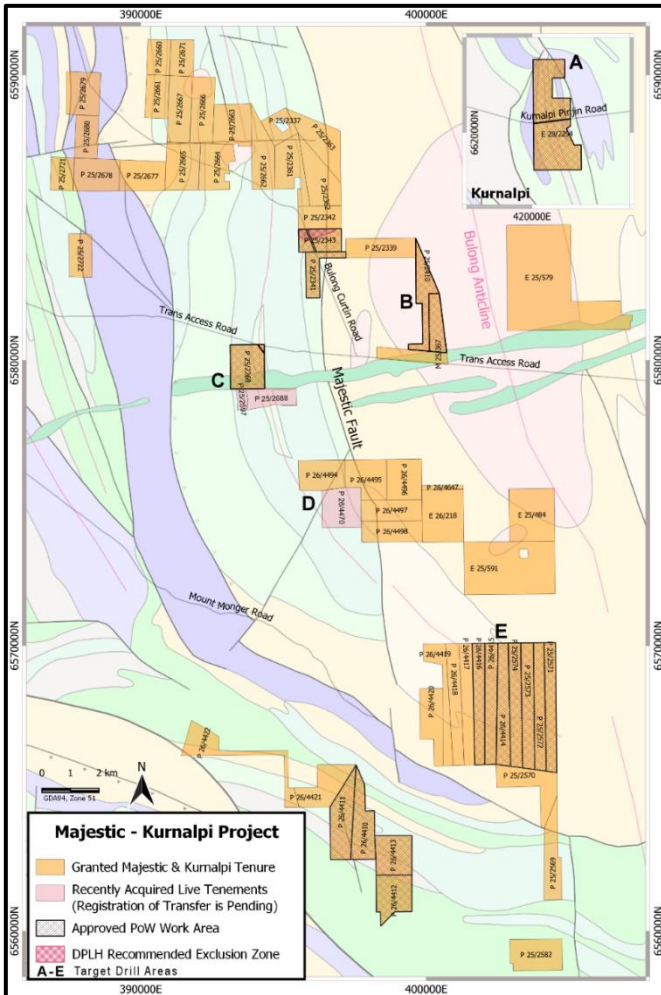

Figure 6: Key drill target areas Majestic and Kurnalpi

Eastern Goldfields Projects, WA

The Eastern Goldfields Project is located approximately 50km east of Kalgoorlie in the area around the Majestic, Kurnalpi and Mt Monger gold mining centres. The project comprises five granted exploration licences, one granted mining lease and fifty-one granted prospecting licences (collectively the 'WA Project Area'). The tenements have been broken down into two distinct projects, a northern Kurnalpi Project and the southern Majestic Project.

In January 2022, an ultra-fine soil survey was completed at the Kurnalpi Project (E28/2294) to identify follow up targets for drill testing. Assay results received from this soil survey confirmed gold anomalies identified previously by exploration including drilling.

During 2022 and 2023, field visits have been undertaken and a number of drill targets (Figure 6) have been identified in the Majestic/Kurnalpi tenements and a number of POW applications have been processed.

Target Area A - Kurnalpi E 28/2294 covers part of the prospective Kurnalpi goldfield and drilling is planned to test the northern extension of the Avoca Fault, that hosts several gold prospects in adjoining leases.

Target Area B covers the possible extension to the adjacent Jones Find mineralisation.

Target Area C will test quartz veining associated with several magnetic highs (Figure 8).

Target Area D Quartz veining on the southern contact of a prominent NS trending dolerite dyke will be targeted in area D.

Target Area E – Burton's Dam testing multiple quartz veins associated with NE-SW and NS trending faults.

Work completed at Majestic/Kurnalpi in June Quarter 2023

In early 2023 rock chip samples were taken at the Burtons Dam & Kurnalpi tenements. Excellent assay results were received from these sampling programmes (see ASX Announcement dated 26 April 2023)

At **Kurnalpi** total of 15 rock chip samples were collected from the northern area of the Kurnalpi tenement E 28/2294. The sampling covered an area of anomalous gold identified by previous drill and soil programs. Quartz veining is associated with an NNW trending regional structure (Avoca Fault) that has been identified in shallow workings in the adjacent Northern Star (Carosue) tenement. The intersection between the Avoca Fault and an unnamed N-S structure that runs along the eastern side of the lease is a high priority target for drilling. E 28/2294 covers part of the prospective Kurnalpi goldfield and drilling is planned to test the northern extension of the Avoca Fault, that hosts several gold prospects in adjoining leases.

Best results from Kurnalpi (Figure 7) included: **OMKNRS3 - 17.5g/t, OMKNRS4 - 8.78g/t, OMKNRS5 - 2.77g/t, OMKNRS10 - 0.21g/t, OMKNRS11 - 1.68g/t, OMKNRS13 - 0.23g/t**

Figure 7: Kurnalpi Significant Gold in rock chips

The **Burtens Dam tenements** are a package of 13 adjoining leases, 1.5km east of the Daisy Milano gold mine.

A total of 24 rock chip samples were collected over a small ridge on the northern boundary of tenement P 26/4415. The sampling targeted a prominent quartz vein system that strikes NW-SE with a sub vertical dip to the southwest. The veining is associated with the interpreted Hogans Fault. Samples were also collected of Mafic / Ultramafic float and in situ undifferentiated Felsic Volcanics with micro quartz veins. The area is a complex combination of NW-SE (Hogans Fault), N-S structures (Salt Creek Fault) and NE-SW cross structures. A Proterozoic dolerite dyke strikes E-W on the northern boundary of the lease. Historical soil sampling across the tenement identified a broad >20ppb gold anomaly to the east and south of the low ridge, indicating shedding from the quartz vein system. A priority drill target will be to test the strike of the quartz veins at 100m below surface.

Best results from Burtens Dam (Figure 8) included: **OMBDRS5 – 2.66g/t, OMBDRS6 – 0.18g/t, OMBDRS11 – 0.93g/t, OMBDRS17 – 0.22g/t**

Figure 8: Burton Dam Significant Gold in rock chips

Preparation in progress for a maiden drill programme to test key targets on these tenements.

Summary of Exploration Expenditure (ASX Listing Rule 5.3.1)

Pursuant to ASX Listing Rule 5.3.1 the Company advised the cash outflows on its mining exploration activities reported in 1.2(a) of its Appendix 5B for the September 2022 quarter are as follows:

Exploration activities on NSW licences:	\$211,772
Exploration activities on WA licences:	\$43,720

Mining Production and Development (ASX Listing Rule 5.3.2)

There were no substantive mining production and development activities during the quarter.

Payment to Related Parties (ASX Listing Rule 5.3.5)

The Company advises that payments to related parties included in section 6.1 of the Appendix 5B report relate to Director Fees and Executive Management fees.

Finance and Use of Funds

Pursuant to ASX Listing Rule 5.34, the Company provides a comparison of its actual expenditure to the estimated expenditure as set out in section 4.6 of the Company's Prospectus.

Activity Description	Funds allocated	Actual to date
Exploration (2 yrs)	\$4,650,000	\$1,523,071
Administration (2 yrs)	\$850,000	\$1,129,159
Expenses of the Offer	\$660,000	\$668,092

The mining tenement interests acquired or relinquished during the quarter and their location

Not applicable.

This ASX announcement has been authorised for release by the Board of Orange Minerals NL.

About Orange Minerals NL

Orange Resources NL (ASX:OMX) is an exploration company listed on the ASX (ASX: OMX) with 100% controlled Australian-based projects in the Lachlan Fold Belt (LFB) of NSW and Eastern Gold Fields of WA, both world-class mineral provinces. The LFB of NSW hosts major mines including Cadia/Ridgeway, North Parkes and Lake Cowal and the tenements in the Eastern Goldfields of WA are close to the Daisy Milano gold mine and Black Cat Syndicate Kal East Gold Project. The Orange Minerals exploration team plan to rapidly explore its tenement packages with aggressive exploration programmes at its key properties. The company is currently focusing on the Calarie, Wisemans Creek and Majestic/Kurnalpi tenements. An initial RC drill programme was completed at Calarie (1,044 metres) in December 2021, followed by a 1,170 metre diamond programme completed in September 2022. Four diamond drill holes were completed at Wisemans Creek (618 metres) in May 2022 and a follow up programme commenced in April 2023.

Competent Persons Statement

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Phil Shields, a Competent Person who is a Member of the Australian Institute of Geoscientists. Mr Shields is an employee of Orange Minerals NL and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Shields consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Forward Looking Statement

This release includes forward – looking statements which involve a number of risks and uncertainties. These forward-looking statements are expressed in good faith and believed to have a reasonable basis. These statements reflect current expectations, intentions or strategies regarding the future and are based on current assumptions. Should one or more of the uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary from the expectations, intentions and strategies described in this announcement. No obligation is assumed to update forward looking statements if these beliefs or opinions should change.

8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	5.688
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer:	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer:	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 July 2023

Authorised by: The Board of Orange Minerals NL

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
